```

POST /list_files/ List Files

POST /calculate/ Calculate Post

The screenshot displays the Swagger UI for a REST API. The main header indicates a POST method for the endpoint `/list_files/`, with the description "List Files". The "Parameters" section is currently empty, showing "No parameters". The "Request body" section is active, marked as "required", and has a dropdown menu set to "application/json". The request body content is a JSON object: `{ "path": "c:\\users\\first" }`. Below the request body, there is a blue "Execute" button and a "Clear" button. The "Responses" section is currently empty. The browser's address bar shows the URL `127.0.0.1:8000/docs#/default/list_files_list_files__post`.
